Improved traction and self-cleaning capability on pavement, soft soil and dirt, as well as in mud.

- The classical directional tread pattern and open-shoulder groove design offer improved traction and self-cleaning capability on pavement, soft soil and dirt, as well as in mud.

Reinforce the massive lugs

- The massive lugs are reinforced by a centerline tread rubber belt and a robust casing is designed to increase its impact resistance.

Endure wear and cuts, which substantially increases longevity

- Exclusive compounds are used to endure wear and cuts, which substantially increases longevity.
